You won't find fiction here - like Wikipedia, Wikibooks is devoted entirely to the sharing of knowledge.

Epidemiology

Epidemiology is the study and analysis of the distribution (who, when, and where), patterns and determinants of health and disease conditions in defined populations. It is a cornerstone of public health, and shapes policy decisions and evidence-based practice by identifying risk factors for disease and targets for preventive healthcare.

Epidemiology - Wikipedia

epidemiology [ep-T-de-me-ol'-o-je] the science concerned with the study of the factors determining and influencing the frequency and distribution of disease, injury, and other health-related events and their causes in a defined human population for the purpose of establishing programs to prevent and control their development and spread. Also, the ...

Epidemiology | definition of epidemiology by Medical ...

Epidemiology definition is - a branch of medical science that deals with the incidence, distribution, and control of disease in a population.

Epidemiology | Definition of Epidemiology by Merriam-Webster

Epidemiology is the branch of medical science that investigates all the factors that determine the presence or absence of diseases and disorders. Epidemiological research helps us to understand how many people have a disease or disorder, if those numbers are changing, and how the disorder affects our society and our economy. The epidemiology of human communication is a rewarding and ...

What Is Epidemiology? | NIDCD

Epidemiology, branch of medical science that studies the distribution of disease in human populations and the factors determining that distribution, chiefly by the use of statistics. Unlike other medical disciplines, epidemiology concerns itself with groups of people rather than individual patients

Epidemiology | medicine | Britannica

Epidemiology is the method used to find the causes of health outcomes and diseases in populations. In epidemiology, the patient is the community and individuals are viewed collectively. By definition, epidemiology is the study (scientific, systematic, and data-driven) of the distribution (frequency, pattern) and determinants (causes, risk ...
