Kawasaki - Lawn Mower Engines - Small Engines

Clean the Air Filter A lawn mower engine will puff out black smoke when the fuel and air mixture is too rich. Because there isn't enough air, combustion is incomplete, and the unburnt fuel in the combustion chamber turns to smoke. You see the same phenomenon when you burn leaves and pack them too tightly to allow air to circulate.

Kawasaki Motors Recalls Lawn Mower Engines | Live Science

Jud, Most common reason for small engine to all of a sudden to start burning oil is an over filled crank case. Some times a faulty needle and seat or fuel shut off solenoid can stick open, allowing gas to flood into the crank case overfilling it, thinning oil and allowing it to burn very easily.

SOLVED: Why is my riding lawn mower burning oil? - iFixit

Oil that is black and has a scorched smell is one indication of a thrown rod. Low oil pressure is another potential symptom. The burning oil may cause black smoke to emerge from the riding mower's...

What Are the Symptoms of a Thrown Rod in a Riding Lawn Mower?

The lawn tractor's engine tries to burn the oil, present in large enough quantities that the smoke turns black instead of white. An overfilled oil compartment is one cause of oil backing into the...

Why Is My John Deere Tractor Spitting out Smoke? | Home ...

Your lawnmower may start burning up oil faster as the oil level recedes. This is due to decreased lubrication in the crankcase, which increases the temperature inside the engine. As the engine heats up, it will start burning oil faster as it will need to keep the cylinder walls, bore and crankcase adequately lubricated.

Causes of a Lawnmower Burning Oil | Hunker

Your engine may have old gas in the tank. Fuel in the last couple of years now has up to 10% ethanol. This ethanol attracts moisture (water) and debris which reduces fuel quality and may cause the engine to run rough (or not at all). Draining your fuel tank and carburetor is a good place to start.
